

Math 1  
Spring Final Exam Instructions

The instructions on the spring final exam currently read as follows:

Complete questions on this exam according to the following instructions:

- Answer at least ten questions overall (including questions 1 and 2).
- Answer at least one question that involves standard 6D (congruence).
- Answer at least one question that involves standard 6F (triangles).
- Answer at least one question that involves standard 7A (coordinate computation).
- Answer questions 1 and 2.

Failure to follow the instructions given above will result in a maximum grade of C on this exam.

On this document, circle the problem number of all problems that you want graded. You must select at least ten problems; you may do more problems and select more than ten problems to have graded. Write all solutions on extra paper. Turn in all work along with this document.

For all problems, show all work. Do not round unless the answer involves money or you are instructed to round. You may use a graphing calculator.
